Designing a Systemic Action Learning Infrastructure Guide

Foster-Fishman & Watson
Michigan State University

Define

- 1. What is our targeted problem and systems change targets?
- 2. What perspectives are needed to problem solve around the targeted problem and systems changes?
- 3. What local dynamics do we need to consider?

Define – Question 1: What is our targeted problem and systems change targets?

Targeted Problem:

Prioritized Systems Change Targets:

Define – Question 2: What perspectives are needed to problem solve around the targeted problem and systems changes?

Consider these perspectives:	What stakeholders in your community should be included? Be specific.
<p>Those experiencing the problem</p> <ul style="list-style-type: none"> • Families, youth, and residents living with the problem 	
<p>Those providing services</p> <ul style="list-style-type: none"> • Public & Private Service providers 	
<p>Those supporting at the local level</p> <ul style="list-style-type: none"> • Stakeholders involved in resident-led, faith-based, local businesses, and neighborhood organizations • Individuals delivering informal supports 	
<p>Those deciding on changes & how resources are used</p> <ul style="list-style-type: none"> • Funders • Local institutions & local organizational leaders • Local officials 	

Define – Question 3: What local dynamics do we need to consider?

Key Dynamics in Community	Implications for Creating a Safe Space for Authentic Dialogue

Design

- 1. Given this, how should we design our infrastructure?

Use the space below to draw potential groups that could make up your systemic action learning infrastructure.
