

# ABLE Change

## System Change Strategy Guide

Foster-Fishman & Watson  
Michigan State University

### Key Processes:

Define

- 1. What are the prioritized root cause chains affecting the Systems Change Targets?
- 2. Where are these root cause chains located in the system?

Design

- 1. What strategies can we use to address the prioritized root causes?
- 2. What strategies can we use to change the overall system?

# Define

- 1. What are the prioritized root cause chains affecting the Systems Change Targets?
- 2. Where are these root cause chains located in the system?

## **Define – Question 1: What are the prioritized root cause chains affecting the Systems Change Targets?**

Review pages #-# of the ABLe Change Manual for a description of how to identify and prioritize root causes of the Systems Change Targets. List your prioritized root causes below.

**Define – Question 2: Where are these root cause chains located in the system?**

Use the Below Diagram to identify the Location of your Prioritized Root Cause. Complete one diagram for each of your prioritized root causes:

# Design

- 1. What strategies can we use to address the prioritized root cause chains?
- 2. What strategies can we use to change the overall system?

## Design – Question 1: What strategies can we use to address the prioritized root cause chains?

Fill out the following worksheet with potential strategies and booster strategies for one of your targeted root cause chains. See pages #-# of the manual as a reference.

### Last Feasible Root Cause in the Chain:

#### Strategy Idea 1:

#### Strategy Idea 2:

**Next Root Cause in the Chain Needing a Booster Strategy:**
